Location : Lucknow, India

Career Objective

- Computer Science undergraduate with hands-on experience in front-end development, AI/ML, and full-stack web applications. Skilled in building scalable, user-focused solutions with a strong foundation in software engineering and problem-solving, eager to contribute to impactful engineering teams in real-world, high-impact projects.

Education

Integral University — Lucknow, India

- *B.Tech – Computer Science & Engineering* — *Aug 2023 – Jul 2027*
  CGPA: 7.9/10 (till 6th semester)

Skills Summary

- **Programming Languages** – Java, Python, JavaScript
- **AI/ML** – Machine Learning, Deep Learning, NLP, LLMs Development, Model Evaluation
- **Generative AI** – Prompt Engineering, AI Agents
- **Core CS** – Data Structures & Algorithms, Operating Systems, OOPs, DBMS, Computer Networks
- **Web Technologies** – React.js, HTML5, CSS, JavaScript
- **Backend Technologies** – Spring Boot, REST APIs, MySQL
- **DevOps & Version Control** – Git, GitHub, Docker

Experience

- **Front-End Developer** — Remote
  Hygiene Matters (Freelance) — *Apr 2025 – Jun 2025*
  - Designed and implemented responsive user interfaces for the company's e-commerce platform, ensuring smooth performance across mobile and desktop devices.
  - Built clean, optimized UI components using HTML, CSS, and JavaScript, improving page consistency and user experience across product pages.
- **Front-End Developer** — Remote
  ChiPi Technologies — *Jun 2026*
  - Designed and implemented responsive user interfaces for the company's e-commerce platform, ensuring smooth performance across mobile and desktop devices.
  - Built clean, optimized UI components using HTML, CSS, and JavaScript, improving page consistency and user experience across product pages.
- **AI & ML Intern** — Lucknow, India
  Sipher Web Academy – 6 Weeks — *May 2025 – Jul 2025*
  - Developed a spam detection model using machine learning techniques, achieving an 87% improvement in email filtering accuracy as the final internship deliverable.
  - Applied NLP and supervised learning concepts to preprocess text data, train classification models, and evaluate performance using Scikit-learn.

Projects

- **TruthLens AI – Explainable Fake News Detection Platform** — *Currently Building*
  - AI/NLP platform for detecting fake, misleading, and AI-generated content with explainable results.
  - Developing evidence-based analysis and confidence scoring through an interactive interface.
- **Hygiene Matters E-Commerce Platform** — Live Demo
  - Developed a fully responsive front-end for a live e-commerce website, delivering clean layouts and seamless user experience across all devices.
  - Optimized interface performance and ensured cross-browser compatibility for a production-grade product catalog.
- **Spam Detection Model**
  - Engineered an SMS spam classification model using CountVectorizer and Multinomial Naive Bayes, trained on 5,572 messages and achieving 98.39% test accuracy.
  - Enabled live user-input testing for real-time spam/ham prediction.
- **ATS Resume Builder** — Live Demo
  - Built a browser-based resume builder enabling users to create clean, ATS-friendly resumes with live formatting and export functionality.
  - Implemented dynamic UI components with real-time updates, helping users structure content for maximum applicant tracking system compatibility.
- **Personal Portfolio Website** — Live Demo
  - Designed and deployed a responsive personal portfolio to showcase projects, certifications, and skills for technical recruiters.

– Implemented smooth navigation, mobile-first layout, and fast-loading UI using vanilla web technologies.

Certifications

- **Certified Generative AI Professional** – Oracle
- **Machine Learning with Python** – IBM
- **Certified Cloud Practitioner** – AWS
- **AI Skills Passport** – Microsoft & EY

Awards & Recognitions

- **Tech Executive – Google Developer Groups on Campus (GDGC), Integral University**
- **Smart India Hackathon (SIH25) – Qualified Internal Rounds**
- **Solution Challenge (SC25) – Google Developer Groups**
